

Wellness Policy:

Maintaining a healthy environment is among our top priorities. We are especially interested in preventing the spread of colds and other communicable diseases. If your child experiences any of the listed symptoms while at school, he/she will be sent home. Your child must then remain out of school for at least 24 hours, symptom-free, if he or she experiences any of the following symptoms:

- Sore throat
- Enlarged glands
- Earache
- Runny Nose
- Cough
- New loss of taste or smell
- Shortness of breath
- Fever
- Headache
- Vomiting
- Diarrhea
- Chills
- Unknown rash

If your child is diagnosed with a communicable disease, including, but not limited to: Chicken Pox, Influenza, Pertussis, Mumps, COVID-19, or Strep Throat; the child must remain symptom free for the prescribed number of days per Health Department guidelines, and obtain a physician's written permission if required, to return to school. This written permission should be given to the director prior to or at the time of re-entry to the school.

Additionally, if your child is experiencing allergy-related symptoms, but their symptoms become difficult or too excessive for them to manage while at school (ex. Excessive sneezing or coughing) then your child should remain at home where they can more comfortably manage their symptoms.

When possible, we will notify families if students have been exposed to any communicable disease, while also maintaining the confidentiality of each student.
